

# AUGER RANGE

## AUGERS TO SUIT ANY SITUATION

All Auger Torque Augers are built from high grade steel and incorporate many features that will allow you to work more efficiently and make your job easier.

### MULTIPLE HUB OPTIONS

Our Augers are available with all major standard hubs on the market, including:-

- ▶ Hex: 2", 2.5", 3 and 4"
- ▶ Round: 50mm, 2" and 4"
- ▶ Square: 57mm, 75mm, 100mm, 110mm and 130mm

### HEAVY DUTY TUBE

We know that our Augers can expect a tough life, so we only use the highest grade steel and vary our tube size according to machine size and application. Our Augers have a reputation of being the toughest on the market.

### SHALLOW PITCH FLIGHTS

By working with and, more importantly, listening to operators feedback we have developed the perfect pitch for our flights. It will cut at its maximum efficiency and, most importantly the spoil will stay on your Auger when you remove it from the hole.

### CONSTANT SPIRAL CUT

Our boring heads are designed with a Constant Spiral Cut. Teeth are located so that each makes its own fresh cut on every revolution and are angled to direct spoil towards the centre of the auger. The tooth cutting angle ensures spoil is broken up thoroughly to avoid any clogging.

### PILOT & TOOTH OPTIONS

Auger Torque Augers are offered with many different tooth and pilot options to suit your specific need. For example in the S4 range we offer up to eight different combinations and we have the know-how to help you select the optimal configuration.

## SHOCK LOCK™ Tooth Locking System

**DON'T LEAVE YOUR TEETH  
DOWN THE HOLE**

With our patented Shock Lock™ Tooth Locking System, tooth loss is now a thing of the past. Using the Shock Lock™ pin and rubber in our unique Shock Lock™ tooth holders ensures your Auger teeth are safely locked in place and protected against shock fractures.

Replacing worn teeth is a breeze with this system, simply knock out the old pin with a standard hole punch and the tooth will slide out of the holder with ease. Acclaimed as the best system on the market you will never need to worry about fitting spare teeth due to losing them again.

### Specifications

#### S4 AUGERS

Hub Options: 2.56in Round, 2in Hex, 2.25in Square  
Wear parts: Earth (Shock Lock™)  
Tungsten (Shock Lock™)  
Extra Dig  
Pilot Extension  
Overall Length: 4ft

#### S5 AUGERS

Hub Options: 2.96in Square, 2.5in Hex  
Wear parts: Earth (Shock Lock™)  
Tungsten (Shock Lock™)  
Rock  
Overall Length: 5ft

#### S6 AUGERS

Hub Option: 2.96in Square  
Wear parts: Earth (Shock Lock™)  
Tungsten (Shock Lock™)  
Rock  
Overall Length: 6ft

#### PA AUGERS

Hub Option: 4.33in Square (optional 3.94 & 5.125in)  
Wear parts: Earth  
Rock  
Overall Length: 7ft 6in & 11ft

#### WEAR PARTS REQUIRED FOR GROUND CONDITIONS

##### EARTH (Shock Lock™)

Best suited to soft grounds like earth and clay.

##### TUNGSTEN (Shock Lock™)

Best used in dry, hard or medium ground conditions where floating rocks may be encountered. The perfect all-rounder if you are not sure about what you might encounter.

##### EXTRA DIG PILOT

A stronger pilot for more demanding ground conditions.

S5 fixed and telescopic extension
